PROBLEM

Problem 1

The hassle of amount of paperwork required to get anything done in India is immense, but only half of what the lack of information about the prerequisites packs. The application for Aadhar card, the most basic need for a citizen of the nation, itself requires a herculean effort. Add in the today's fast paced stressful lifestyles, and we end up with a huge gap between the students and their basic needs

Problem 2

Students applying for colleges outside of their hometowns have to manage packing and moving their essentials alongside the mammoth task of preparing themselves for the University life. The lack of information about the whereabouts of the campus add to the confusion

SOLUTION

DOCUMENT STORAGE

Securely creating a decentralized file storage that keeps all necessary documents uploaded by the user. A recommendations bot that fetches the documents required.

FINTECH

SCHOOL KIT

Marketplace for curated starter kits, completely flexible with its contents that delivers right at the doorstep of the students' accommodation. All essential immediate needs items covered with information about the whereabouts of the campus.

FINTECH

Unifresh, a one stop ecommerce platform the offers AI curated baskets. The items get added to the baskets based on popularity and analysis. Students can offer before their date of arrival at their respective accomodation and the orders get delivered in sync to their new doorsteps. Procurement of inventory takes place locally, to ensure future re-orders. An additional information portal giving the details of the whereabouts of the campus, like nearest railway station, grocery stores, bank, Accomodation, places of interest and more. The students would feel a lot more acquainted and a lot less afraid of their new beginnings.

OPEN INNOVATION

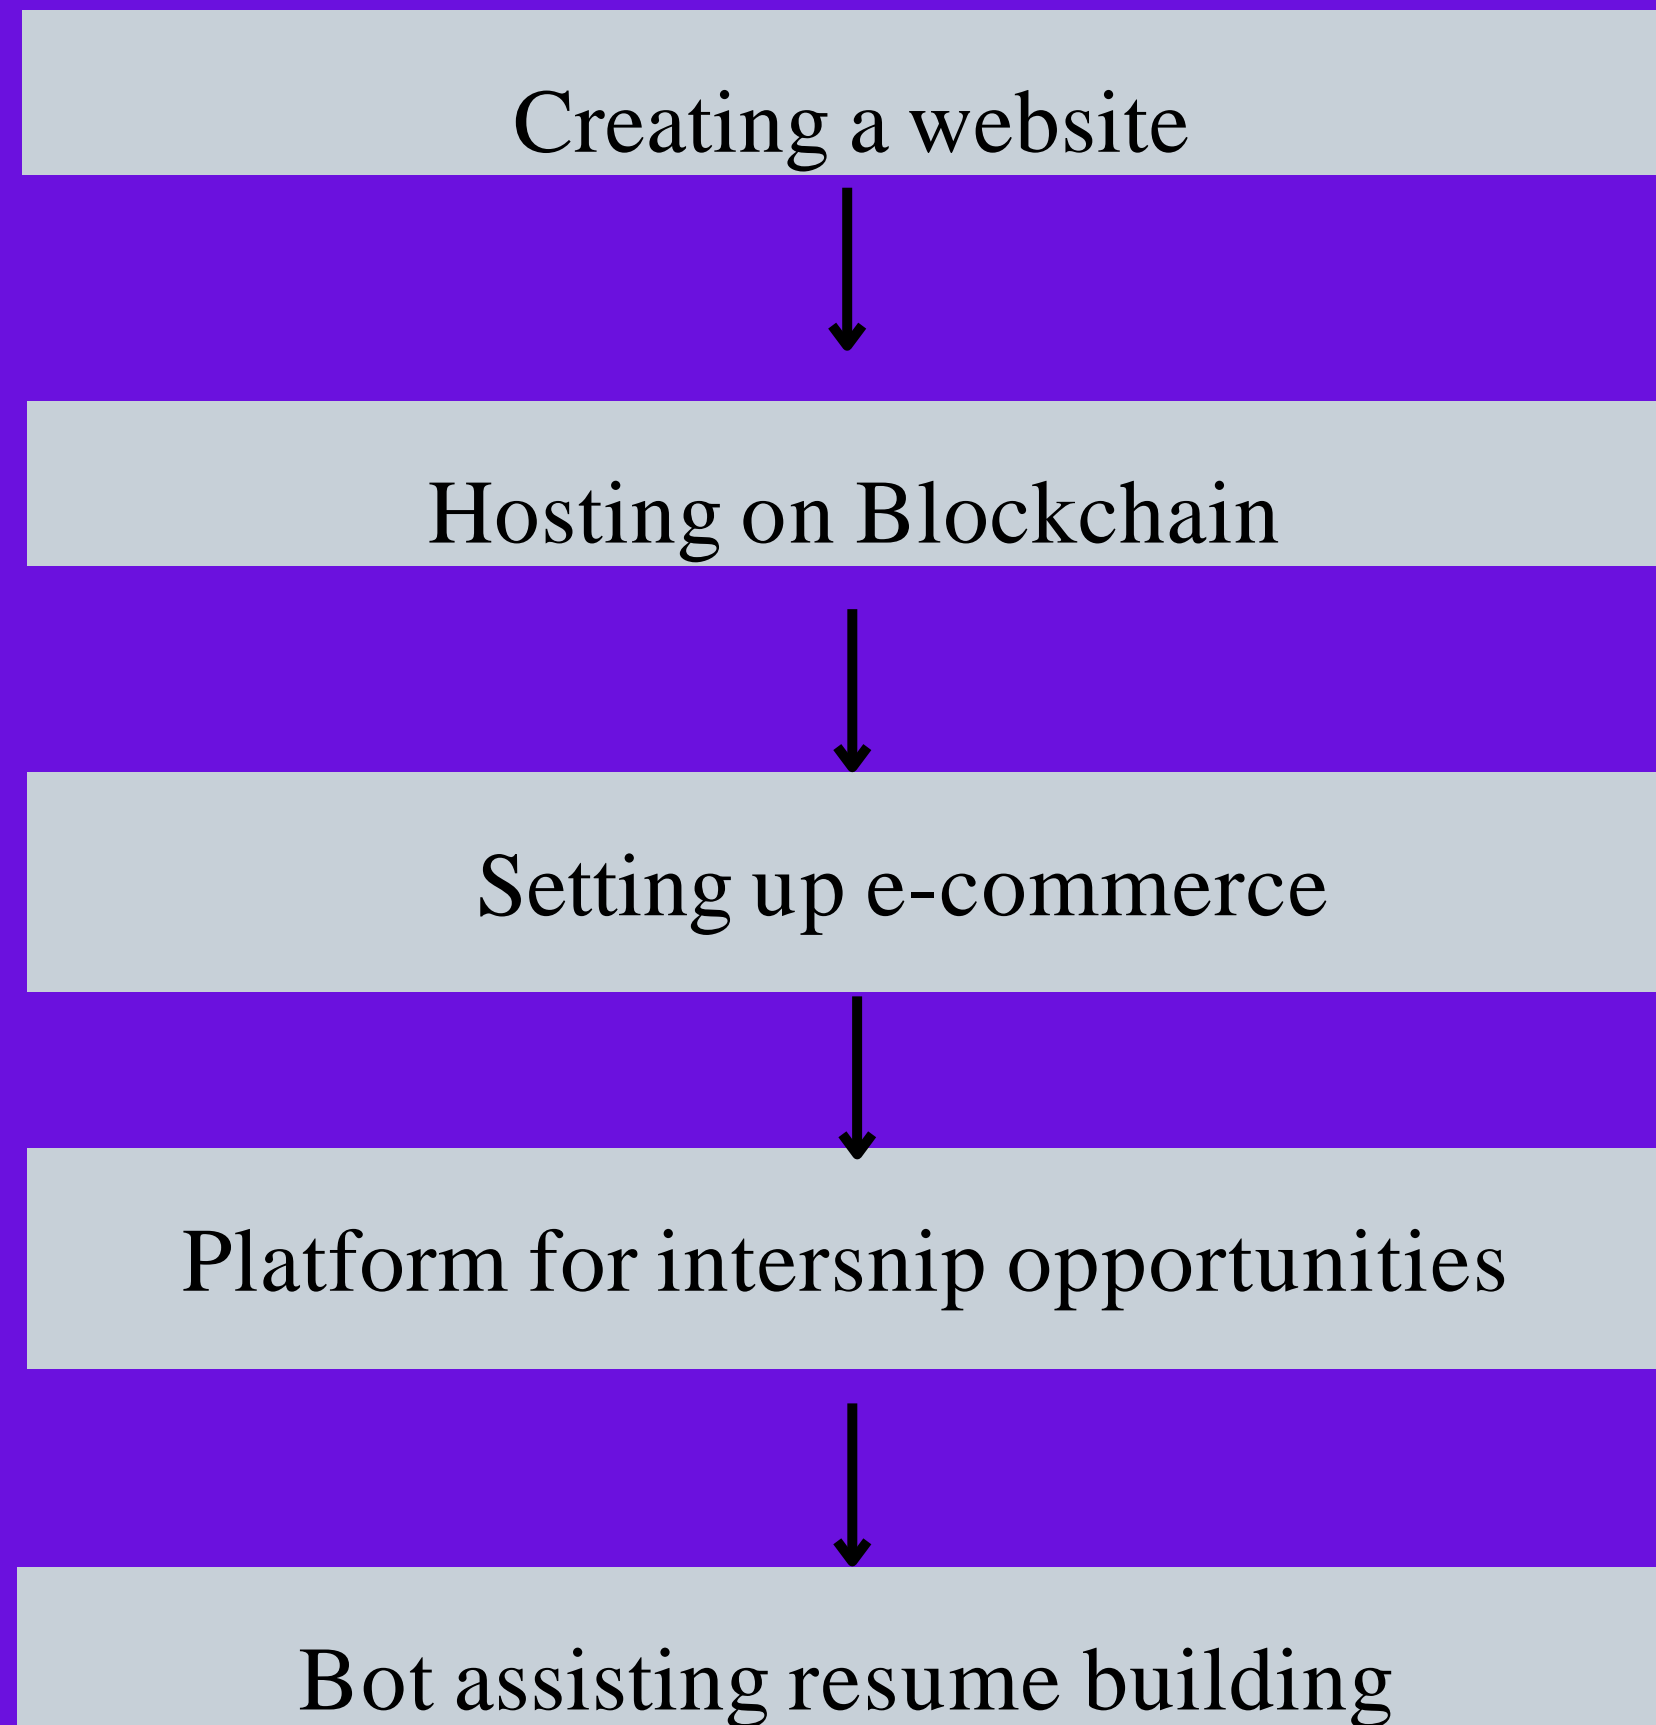

A cloud storage service hosted on Ethereum blockchain network, providing a safe and accessible way to store all your important documents in one place. To add more functionality, an advisory bot that sorts required documents for any given task (applying for Driver's license, PAN card, passport) from the user uploaded ones. To further improve the security, the website too is hosted on blockchain to adopt a decentralised approach.
